Queensland Health

The patient journey is critical to patient care and positive health outcomes

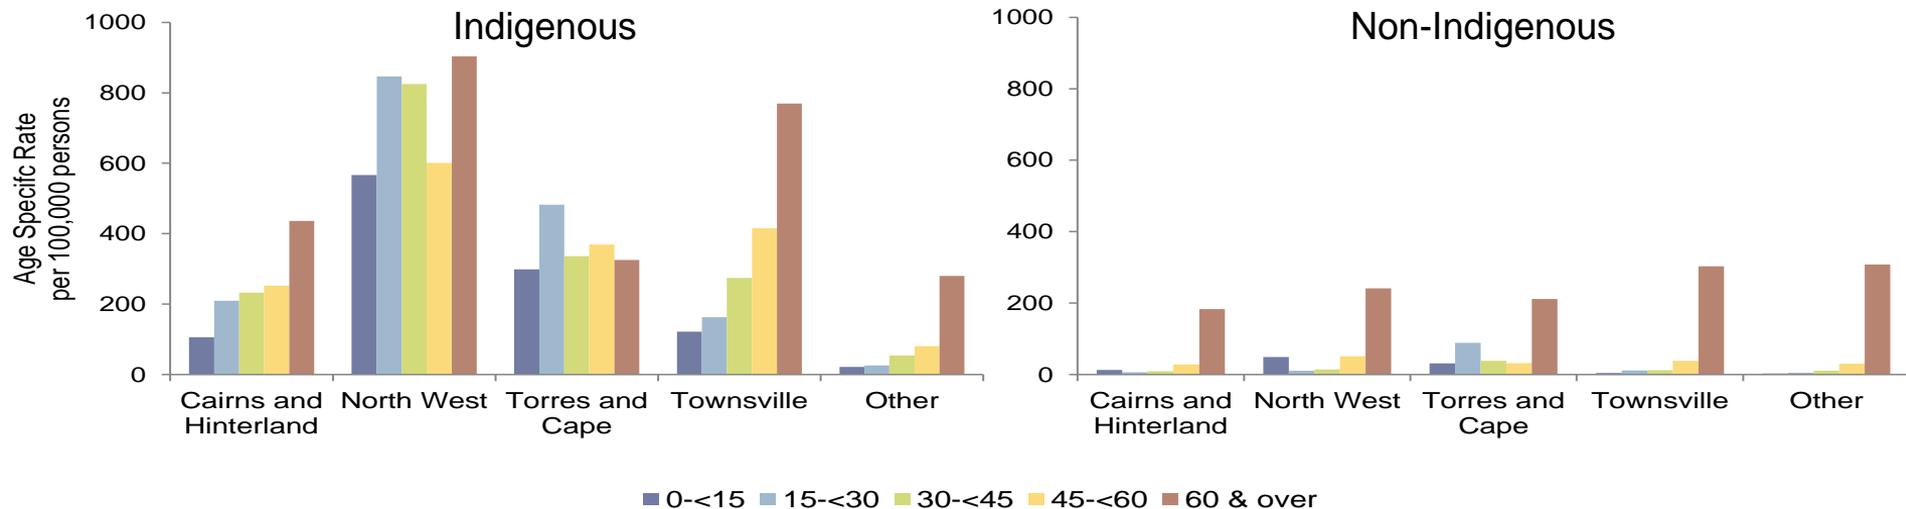

## Indigenous potentially preventable hospitalisations for rheumatic heart disease (2010/11 - 2014/15)

Source: QHAPDC, HHS of usual residence

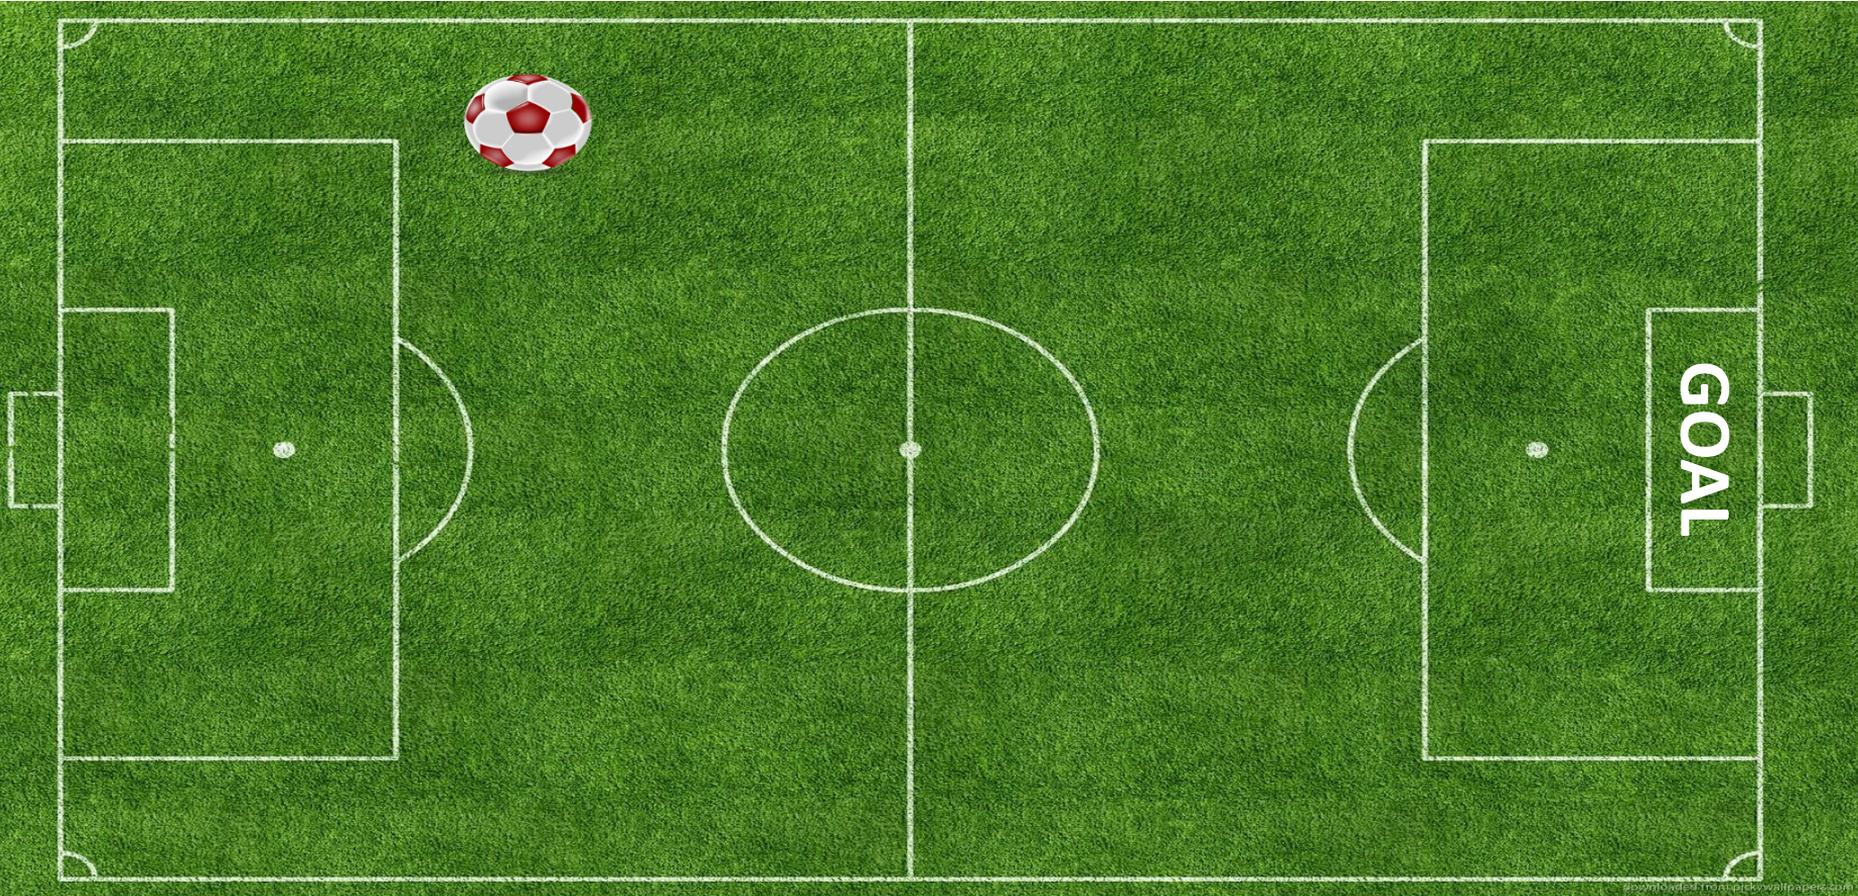

# Hospital Separations by age & Indigenous status

## ARF/RHD hospitalisation rates (2010/11 - 2014/15)

Source: QHAPDC, ICD-10-codes I00-I02, I05-I09, principal or other diagnosis, HHS of usual residence

# Where are we & where do we want to be

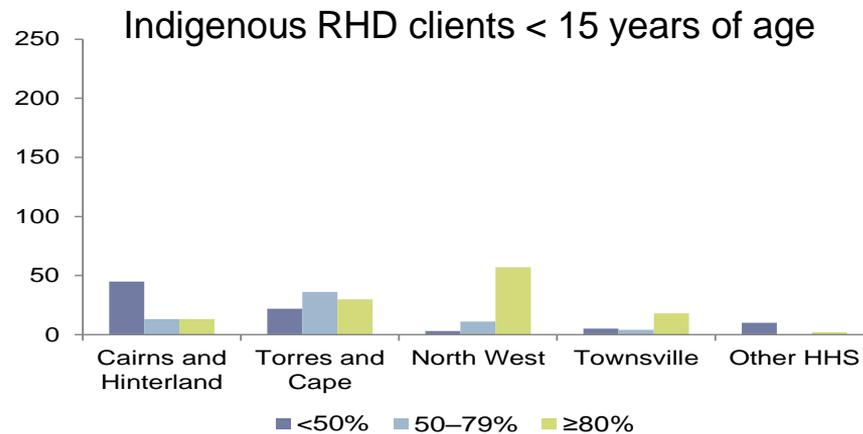

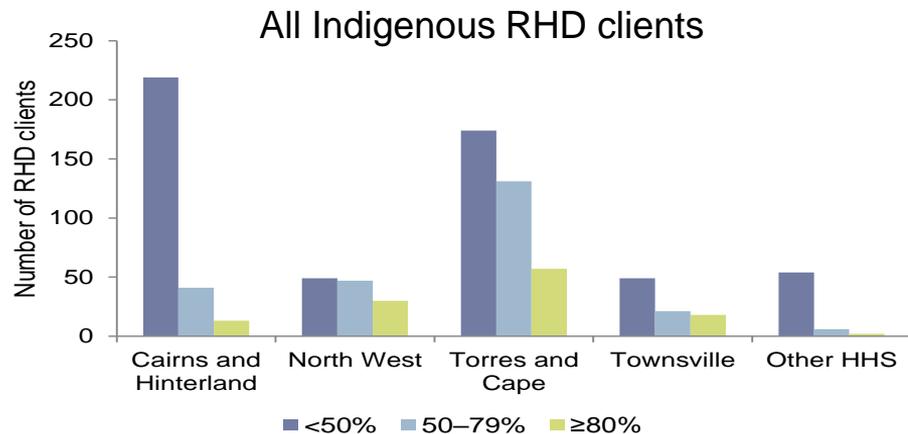

# Current

- Admissions and procedures
- Costs at the wrong part of the system
- Underuse of the register
- Poor prophylactic coverage
- Lack of awareness

## Number of Indigenous RHD clients cent receipt of scheduled BPG injections (2014-15)

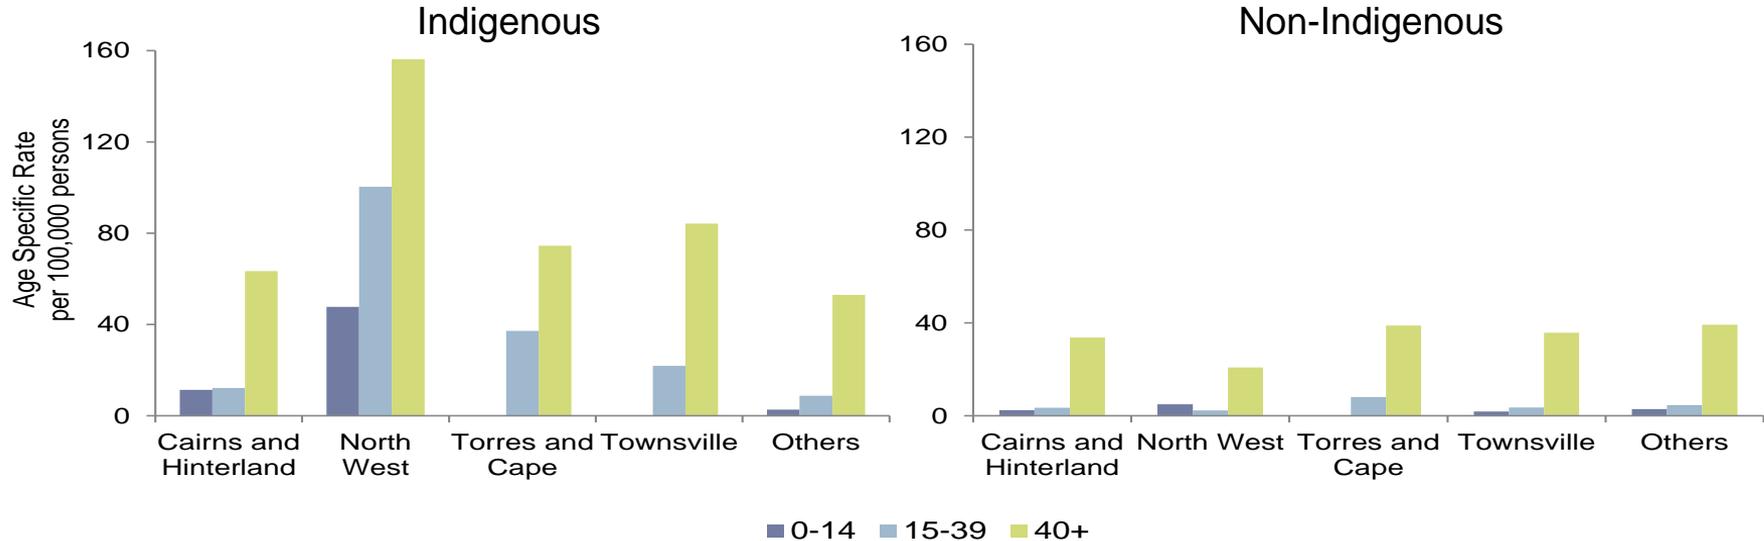

Source: Queensland RHD Control Register

# Valve surgery by age & Indigenous status

## Hospitalisation rates for valve procedures (2012 - 2015)

Source: DSS, DRG-codes F03A, F03B, F04A, F04B, HHS of usual residence

## Valve surgery

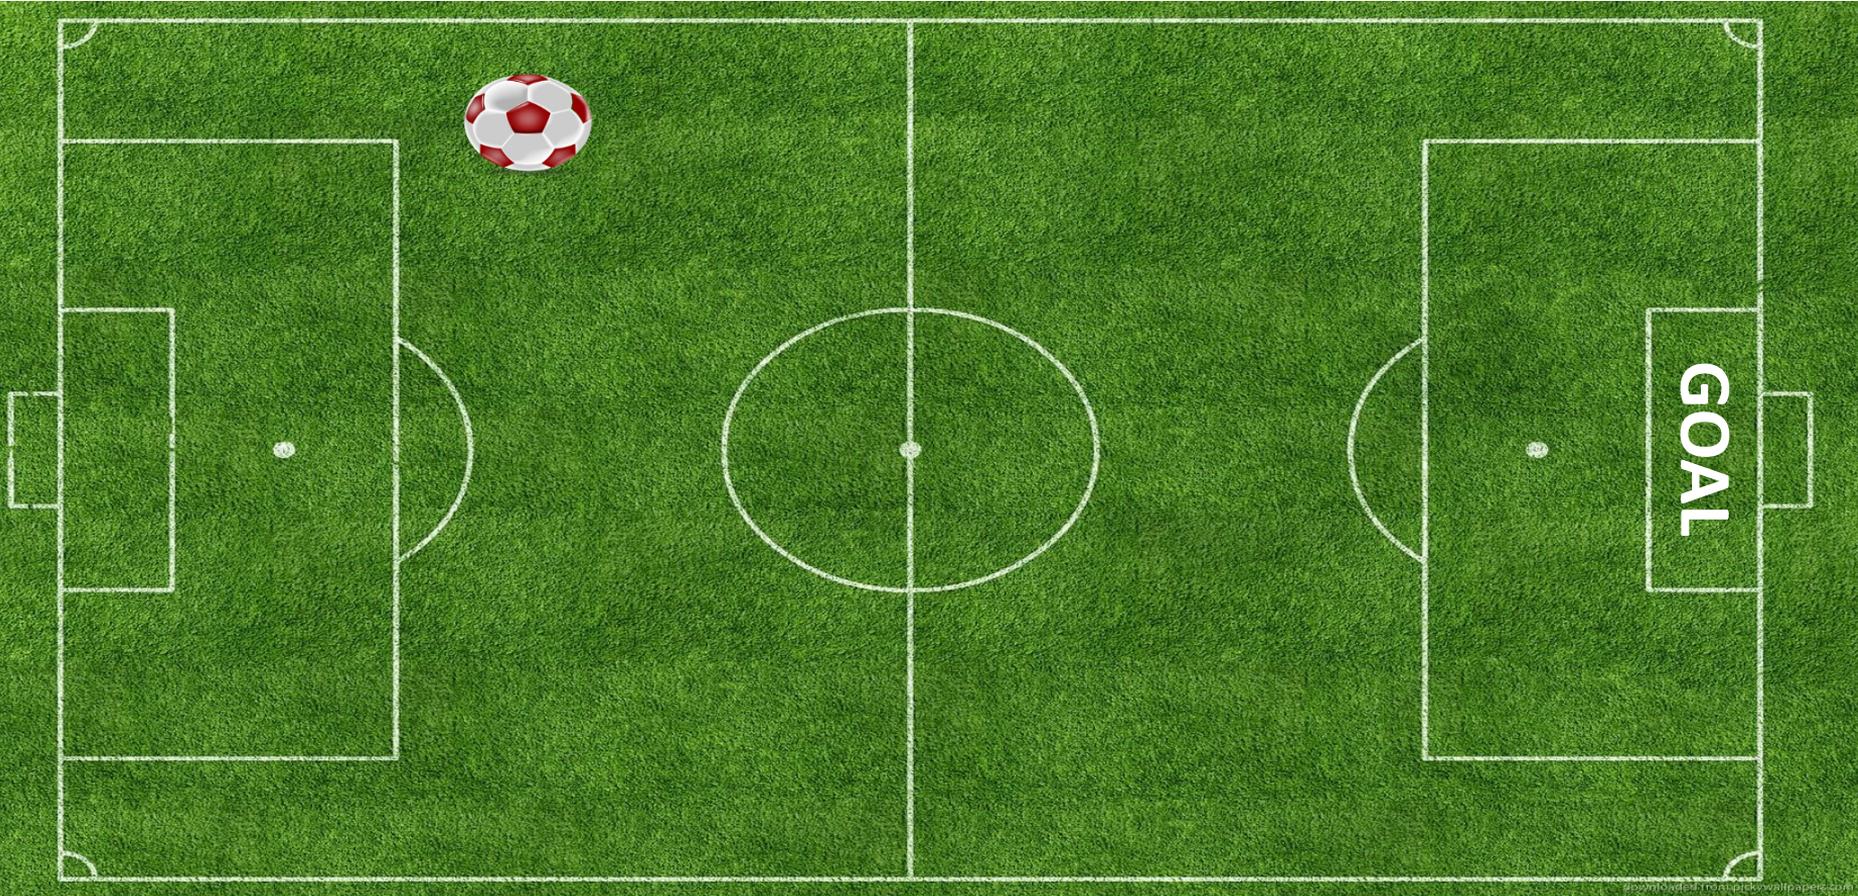

Total purchase for Indigenous patients over four years (2012-2015)

**\$10.3m**

**Expected purchase = if Indigenous population underwent valve surgery at same rate as non-Indigenous**

# Where are we & where do we want to be

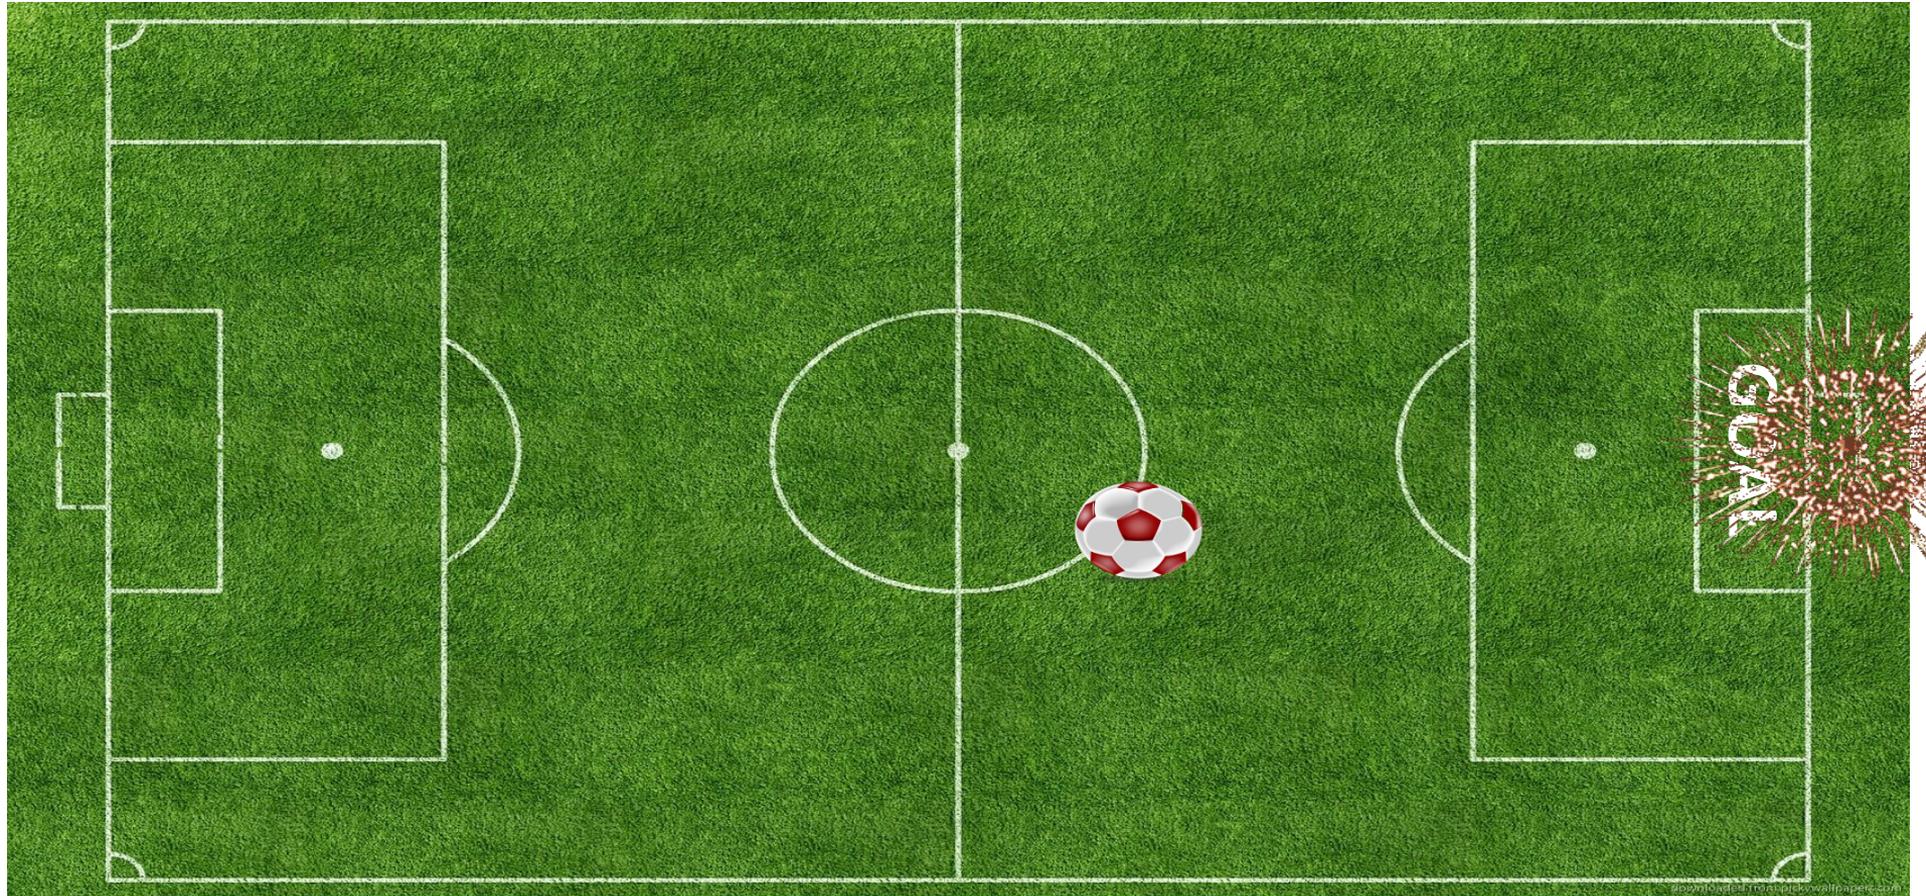

# 2018 - Post Strategy

- Broadened clinical awareness
- Increased consumer awareness
- Use of guidelines
- Empowered register and utilised Statewide
- Increased prophylactic management
- Strong local compliance management plans.
- Links between parts of the health systems.
- Start shift away from acute care

# Where are we & where do we want to be

# 2033 – Eliminate

- ***Elimination of disease:*** Reduction to zero of the incidence of a specified disease in a defined geographical area as a result of deliberate efforts; continued intervention measures are required.
- Close the gap in all areas of social disadvantage.
- Primordial prevention.
- Vaccine??
- Early treatment – primary prevention.
- Addressing identified gaps in health system.
